INTRODUZIONE | INTRODUCTION

PRICE LIST NOTES

PRICE LIST VALID FOR EUROPE, MIDDLE AND FAR EAST, OCEANIA, AFRICA AND NORTH AMERICA.

EDITION: REV8_2024, VALID FROM JANUARY 2026

ALL PRICES INCLUDED IN THIS PRICE LIST ARE RECOMMENDED AS MAXIMUM FINAL SELLING PRICE ON THE MARKETS OF VALIDITY.

ALL PRICES INCLUDED IN THIS PRICE LIST ARE IN EURO CURRENCY AND EX-WORKS (BELLITALIA WAREHOUSES).

BASED ON MATERIAL AND ALL PRODUCT TYPE, SOME SPECIAL OPTIONS AND REPARATION AND MAINTENANCE OPTIONS ARE AVAILABLE UPON REQUEST AND WITH SURCHARGE.

FOR SHELTERS, PLEASE SEE THE "IMPORTANT INFO ON SHELTERS, COVERS AND SHADING STRUCTURES"

DUE TO PACKING AND TRANSPORT NEEDS, BELLITALIA PRODUCTS ARE PROVIDED IN SIMPLE COMPONENTS TO ASSEMBLE, EXCEPT FOR THOSE ARTICLES WHICH CAN BE DELIVERED ALREADY FULLY ASSEMBLED, THANKS TO THEIR SHAPE, WEIGHT AND SIZE. FOR THE AVAILABLE PACKAGING OPTIONS, PLEASE SEE THE ANNEX "PACKAGING OPTIONS" (ANNEX A0-1 - A0-2).

GLOSSARY: ABBREVIATIONS, TERMINOLOGY AND SYMBOLS

HTC

HIGH TENSE CONCRETE

UTC®

ULTRA TENSE CONCRETE ®

NECESSARY COMPLEMENT

ELEMENT NECESSARY TO COMPLETE THE PRODUCT.

ALL ELEMENTS INDICATED AS "NECESSARY COMPLEMENT" IN THE PRICE LIST HAVE TO BE REQUIRED IN THE LPO BY THE CLIENT.

ATTENTION: BELLITALIA SALES DEPT. WILL NOT INCLUDE THEM IN THE ORDERS AUTOMATICALLY.

OPTIONAL

OPTIONAL ACCESSORY UPON REQUEST

FLAMMABLE MATERIAL

PLEASE VERIFY WITH YOUR FORWARDER SAFETY MEASURES FOR TRANSPORTATION.

RECONSTRUCTED PRECIOUS STONES - RECONSTRUCTED GRANITE STONES

PIETRE PREZIOSE RICOSTITUITE - PIETRE RICOSTITUITE GRANITO

PIEDRAS PRECIOSAS RECONSTITUIDAS - PIEDRAS RECONSTITUIDAS GRANITO

PIERRES PRÉCIEUSES RECONSTITUE'ES - PIERRES RECONSTITUE'ES GRANITES

RECONSTRUCTED GRANITE STONES

Bellitalia® has created its own formulas to recreate the beauty of natural stone combined with the technical characteristics of concrete. Bellitalia® reconstituted stones are divided into Reconstituted Precious Stones and Reconstituted Granite.

RECONSTRUCTED PRECIOUS STONES

Bellitalia® manufactures its own reconstituted prestigious stones using a base of Portland cement and aggregates of highly prized stone (marble and porphyry) of various sizes sourced from local quarries. We offer a selection of 8 colour variants based on the aggregates used:

PIETRE RICOSTITUITE GRANITO

Bellitalia® ha ideato le proprie formule per ricreare la bellezza della pietra naturale unita alle caratteristiche tecniche del cemento. Le pietre ricostituite Bellitalia® si dividono in Pietre Preziose Ricostituite e Granito Ricostituito.

PIETRE PREZIOSE RICOSTITUITE

Bellitalia® crea le proprie pietre preziose ricostituite utilizzando una base di cemento Portland e inerti di pietre di pregio (marmi e porfido) di varie pezzature provenienti da cave locali. A seconda degli inerti utilizzati, vi sono 8 varianti colore a scelta tra:

PIEDRAS RECONSTITUIDAS GRANITO

Bellitalia® ha concebido sus fórmulas para recrear la belleza de la piedra natural combinada con las características técnicas del cemento. Las piedras reconstituidas de Bellitalia® se dividen en Piedras Preciosas Reconstituidas y Granito Reconstituido.

PIEDRAS PRECIOSAS RECONSTITUIDAS

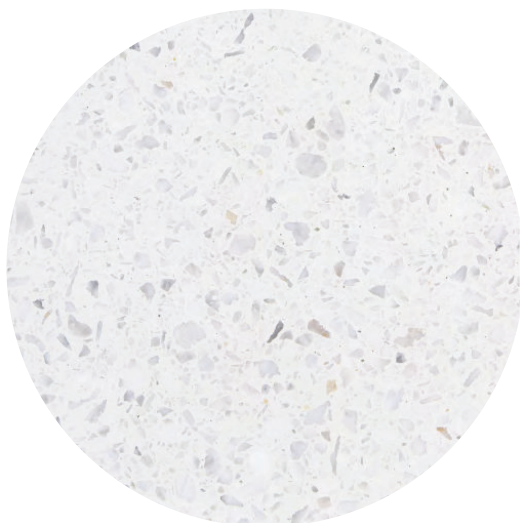

Bellitalia® crea sus piedras preciosas reconstituidas utilizando una base de cemento Portland y áridos de piedras de valor (mármoles y pórfido) de varios tamaños con procedencia de canteras locales. Dependiendo de los áridos utilizados, existen 8 variantes de color a elección entre:

PIERRES RECONSTITUE'ES GRANITES

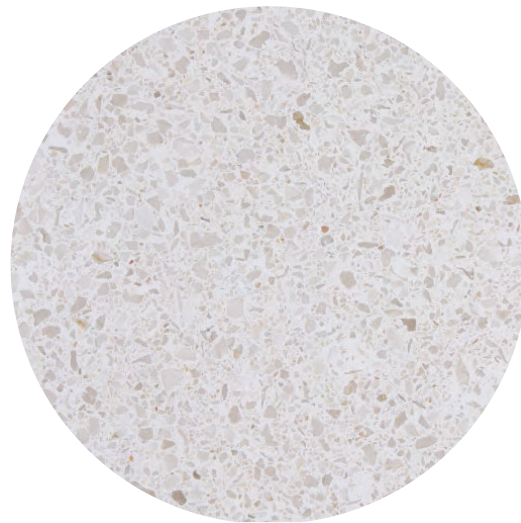

Bellitalia® a conçu ses formules en vue de recréer la beauté de la pierre naturelle conjugée aux caractéristiques techniques du ciment. Les pierres reconstituées de Bellitalia® sont classées en pierres précieuses reconstituées et en granit reconstitué.

PIERRES PRÉCIEUSES RECONSTITUE'ES

Bellitalia® crée ses pierres précieuses reconstituées à l'aide d'une base de ciment Portland et d'agrégats de pierres de qualité supérieure (marbre et porphyre) de différentes tailles provenant de carrières locales. En fonction des agrégats utilisés, 8 variétés de couleurs sont disponibles:

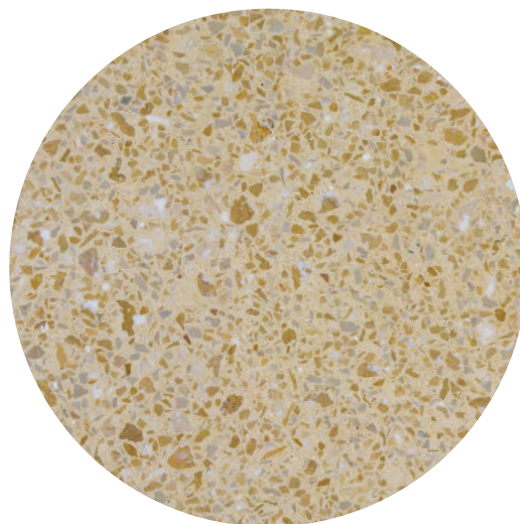

BIANCO CARRARA

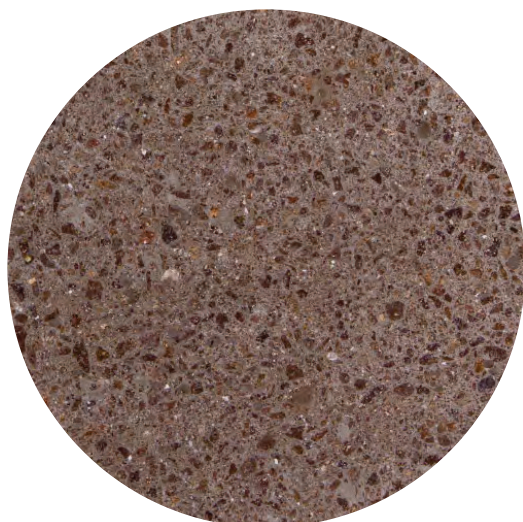

BOTTICINO

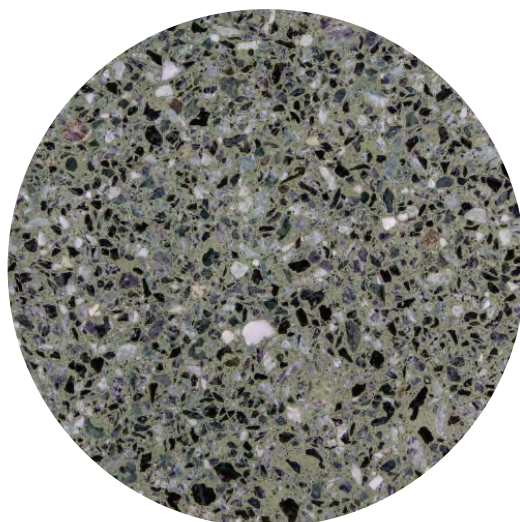

ROSSO VERONA

GIALLO MORI

PORFIDO

VERDE ALPI

VENEZIANO

NERO EBANO

RECONSTITUTED STONE - RECONSTITUTED GRANITE PIETRE RICOSTITUITE - GRANITO RICOSTITUITO PIEDRAS RECONSTITUIDAS - GRANITO RECONSTITUIDO PIERRES RECONSTITUÉES - GRANIT RECONSTITUÉ

Bellitalia® creates its own reconstituted granite using a Portland cement base and river-based aggregates of various sizes sourced from local quarries. Choose from two colour variants:

Bellitalia® crea il proprio granito ricostituito utilizzando cemento Portland, sabbie fluviali e pietrisco di varia pezzatura provenienti da cave locali. Vi sono due varianti colore a scelta tra:

Bellitalia® crea su granito reconstituido utilizando una base de cemento Portland y áridos fluviales y piedra triturada de distintos tamaños procedente de canteras locales. Existen dos variantes de color a elección entre:

Bellitalia® crée son granit reconstitué à l'aide d'une base de ciment Portland et d'agrégats de rivière de différentes tailles provenant de carrières locales. Deux variétés de couleurs sont disponibles:

GRANITO GRIGIO

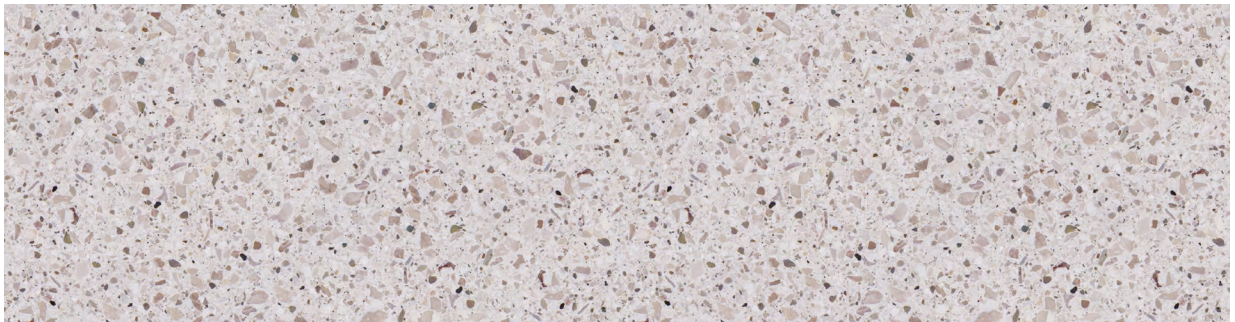

GRANITO BIANCO

FINITIONS ET TRAITEMENTS DES PIERRES PRÉCIEUSES ET
DU GRANIT

Bellitalia® offers the following finishes on its products made of reconstituted stones (precious and granite).
To verify the available finishes on each product please refer to the relative page of the catalogue.

Bellitalia® opera le seguenti finiture per i propri manufatti in pietre ricostituite (preziose e granito).
Per conoscere le finiture possibili su ciascun prodotto vedere la relativa pagina del catalogo.

Bellitalia® realiza los siguientes acabados para sus productos en piedras reconstituidas (preciosas y granito).
Consultar la página relativa del catálogo para saber cuál/cuáles es/son el/los acabado/s posibles para cada producto.

Bellitalia® réalise les finitions suivantes sur ses produits en pierre reconstituée (pierre précieuse et granit).
Voir la page de catalogue correspondante pour en savoir plus sur les finitions possibles sur chaque produit.

Brushing: the product is polished manually or mechanically with robotic machines that remove the surface layer of the material to give the product a smooth but rough-looking surface.

Spazzolatura: il manufatto viene levigato manualmente o meccanicamente con macchinari robotizzati che rimuovono lo strato superficiale del materiale per conferire al prodotto una superficie liscia ma all'aspetto "grezza-materica".

Cepillado: el producto es cepillado manual o mecánicamente con maquinarias robotizadas, que eliminan la capa superficial del material para otorgar al producto una superficie lisa pero de aspecto rugoso.

Brossage: le produit est poncé manuellement ou mécaniquement à l'aide de machines robotisées qui retirent la couche de surface du matériau afin de conférer à l'article une surface lisse mais d'aspect rugueux.

Polishing: the product is olished manually or mechanically with robotic machines that remove the surface layer of the material to give the product a smooth surface.

Levigatura: il manufatto viene levigato manualmente o meccanicamente con macchinari robotizzati che rimuovono lo strato superficiale del materiale per conferire al prodotto una superficie liscia.

Pulido: el producto es pulido manual o mecánicamente con maquinarias robotizadas, que eliminan la capa superficial del material para otorgar al producto una superficie lisa.

Polissage: le produit est poncé manuellement ou mécaniquement à l'aide de machines robotisées qui retirent la couche de surface du matériau afin de conférer à l'article une surface lisse.

Bush hammering: the bush-hammers break the superficial stones, giving the surface a rough appearance that highlights its valuable aggregates.

Bocciardatura: la finitura martellinata rompe superficialmente le pietre, donando al manufatto un aspetto ruvido che fa risaltare al massimo gli inerti pregiati che lo compongono.

Escodado: el acabado escodado rompe las piedras en superficie, otorgando al producto un aspecto rugoso que resalta al máximo los áridos valiosos que lo componen.

Bouchardage: la finition martelée brise les pierres sur la surface, conférant au produit un aspect rugueux valorisant au maximum les fins agrégats qui le composent.

Sandblasting: sandblasting is a mechanical process that uses a powerful jet of compressed air and siliceous sands to perform a superficial removal of material that brings out the underlying stones (which constituting it).

Sabbiatura: la sabbiatura è una lavorazione meccanica che utilizza un potente getto di aria compressa e sabbie silicee per eseguire un'asportazione superficiale di materiale che fa risaltare le pietre di sottofondo (che lo compongono).

Esmerilado con arena: el esmerilado con arena es un tratamiento mecánico, que utiliza un chorro potente de aire comprimido y arenas silíceas, para efectuar una retirada superficial de material, que hace aflorar las piedras subyacentes (que lo constituyen).

Sablage: le sablage est un procédé mécanique employant un puissant jet d'air comprimé et du sable siliceux permettant un décapage superficiel du matériau en faisant ressortir les pierres sous-jacentes (qui le constituent).

ULTRATENSE CONCRETE

UTC® by Bellitalia® is a latest-generation UHPC (Ultra High Performance Concrete). Comprising a patented blend of very fine aggregates, stainless steel fibres (and in specific cases also glass fibres) and a complex balance of additives expertly mixed to form a homogeneous and compact matrix, UTC® delivers enhanced mechanical properties and excellent fluidity that does not require vibration. This allows us to obtain a good surface appearance for the product straight out of the mould, meaning the manufacturing process for producing this concrete is even more sustainable. For this reason, UTC® is only available with a smooth formwork finish. Available in a range of 7 colours, which are characterised by the oxides contained in the mixture itself. UTC® products are treated as standard with a transparent anti-degradation varnish. On request, it is possible to replace this treatment with either nanotechnology or anti-graffiti paint at an extra charge.

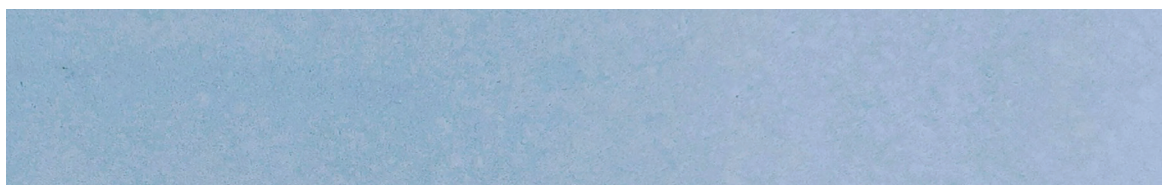

UTC® di Bellitalia® è un calcestruzzo della tipologia degli UHPC (Ultra High Performance Concrete) di ultima generazione. Composto da una miscela brevettata di aggregati finissimi, fibre di acciaio inossidabile (e in casi specifici anche fibre di vetro) e da un complesso bilanciamento di additivi sapientemente mixati per formare una matrice omogenea e compatta, UTC® presenta proprietà meccaniche elevate ed un'ottima fluidità che non richiede vibrazione, permettendo di ottenere un buon aspetto superficiale del manufatto già in fase di apertura dello stampo e rendendo così il processo produttivo di questo calcestruzzo ancora più sostenibile. Per tale ragione UTC® è disponibile solo in finitura liscio cassero. Le colorazioni disponibili sono 7 e sono caratterizzate dagli ossidi contenuti nell'impasto. I manufatti in UTC® vengono di norma trattati con una vernice antidegrado trasparente. Su richiesta è possibile sostituire, con sovrapprezzo, tale trattamento con una vernice sia nanotecnologica che anti-graffiti.

UTC® de Bellitalia® es un hormigón del tipo de los UHPC (Ultra High Performance Concrete) de última generación. Compuesto por una mezcla con patente de materiales inertes muy finos, fibras de acero inoxidable (y, en casos específicos, también fibras de vidrio) y por un equilibrio complejo de aditivos sabiamente mezclados para formar una matriz homogénea y compacta, UTC® presenta propiedades mecánicas elevadas y una óptima fluidez, que no requiere vibración, permitiendo obtener un buen aspecto superficial del producto durante la fase de apertura del molde y logrando que el proceso de producción de este hormigón sea todavía más sostenible. Por dicho motivo, UTC® está disponible solamente con el acabado liso encofrado. Los colores disponibles son 7 y se caracterizan por los óxidos contenidos en la masa. Los productos en UTC® suelen tratarse con una pintura antideterioro transparente. Bajo pedido, es posible sustituir este tratamiento por nanotecnología o pintura antigraffiti, con un coste adicional.

Le UTC® de Bellitalia® est un béton UHPC (Ultra High Performance Concrete). Composé d'un mélange breveté de granulats très fins, de fibres d'acier inoxydable (et dans certains cas aussi de fibres de verre) et d'un dosage complexe d'additifs minutieusement mélangés de manière à former une matrice homogène et compacte, le UTC® offre des propriétés mécaniques élevées et une excellente fluidité ne nécessitant pas de vibration, ce qui permet d'obtenir un bel aspect de la surface du produit dès l'ouverture du moule rendant ainsi le procédé de fabrication de ce béton encore plus durable. Pour cette raison, le UTC® n'est disponible qu'avec une finition coffrage lisse. Disponible en 7 couleurs, caractérisées par la présence d'oxydes dans le mélange. Les produits en UTC® sont généralement traités à l'aide d'un vernis anti-dégradation transparent. Sur demande, il est possible de remplacer ce traitement par une peinture nanotechnologique ou anti-graffiti, moyennant un supplément.

HIGHTENSE CONCRETE

HTC by Bellitalia is a latest-generation HPC (High Performance Concrete). Comprising a blend of natural aggregates of differing size and special additives (including in specific cases also glass fibres), HTC delivers good mechanical properties and excellent fluidity that does not require vibration. This allows us to obtain a good surface appearance for the product straight out of the mould, meaning the manufacturing process for producing this concrete is even more sustainable. For this reason, HTC is only available in a smooth formwork finish. Available in a range of 7 colours, which are characterised by the oxides contained in the mixture itself. HTC products are usually treated with a transparent anti-degradation varnish. On request, it is possible to replace this treatment with either nanotechnology or anti-graffiti paint at an extra charge.

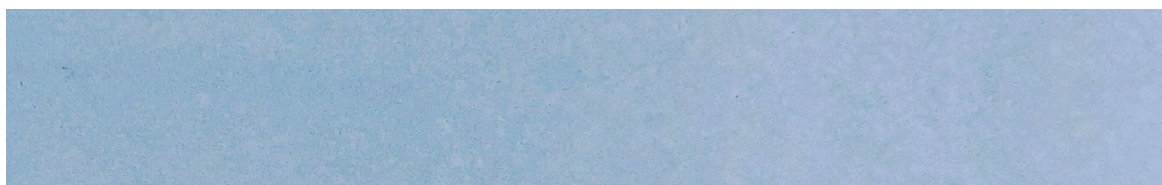

HTC di Bellitalia® è un calcestruzzo della tipologia degli HPC (High Performance Concrete) di ultima generazione. Composto da una miscela di aggregati naturali di varie pezzature e speciali additivi (e in casi specifici anche da fibre di vetro), HTC presenta buone proprietà meccaniche ed un'ottima fluidità che non richiede vibrazione, permettendo di ottenere un buon aspetto superficiale del manufatto già in fase di apertura dello stampo, rendendo così il processo produttivo di questo calcestruzzo ancora più sostenibile. Per tale ragione l'HTC è disponibile sia in finitura liscio cassero che levigato (solo sulle superfici piane) così mettendo in evidenza gli inerti sottostanti. Le colorazioni disponibili sono 7 e sono caratterizzate dagli ossidi contenuti nell'impasto. I manufatti in HTC vengono di norma trattati con una vernice antidegrado trasparente. Su richiesta, con sovrapprezzo, è possibile sostituire tale trattamento con una vernice nanotecnologica anti-graffiti.

HTC de Bellitalia® es un hormigón del tipo de los HPC (High Performance Concrete) de última generación. Compuesto por una mezcla de materiales inertes naturales de varios tamaños y aditivos especiales (y, en casos específicos, también fibras de vidrio), HTC presenta buenas propiedades mecánicas y una óptima fluidez, que no requiere vibración, permitiendo obtener un buen aspecto superficial del producto durante la fase de apertura del molde y logrando que el proceso de producción de este hormigón sea todavía más sostenible. Por dicho motivo, HTC está disponible solamente con el acabado liso encofrado. Los colores disponibles son 7 y se caracterizan por los óxidos contenidos en la masa. Los productos en HTC suelen tratarse con una pintura antideterioro transparente. Bajo pedido, es posible sustituir este tratamiento por nanotecnología o pintura antigraffiti, con un coste adicional.

Le HTC de Bellitalia® est un béton HPC (High Performance Concrete). Composé d'un mélange de granulats naturels de différentes tailles et d'additifs spéciaux (et dans certains cas aussi de fibres de verre), le HTC offre un bon pouvoir mécanique et une excellente fluidité ne nécessitant pas de vibration, ce qui permet d'obtenir un bel aspect de la surface du produit dès l'ouverture du moule rendant ainsi le procédé de fabrication de ce béton encore plus durable. Pour cette raison, le HTC n'est disponible qu'avec une finition coffrage lisse. Disponible en 7 couleurs, caractérisées par la présence d'oxydes dans le mélange. NATURAL FEATURES OF CONCRETE

CARATTERISTICHE NATURALI DEL CALCESTRUZZO

CARACTERÍSTICAS NATURALES DEL HORMIGÓN

CARACTÉRISTIQUES NATURELLES DU BÉTON

In general, superficial aspect of concrete cannot be perfectly uniform and smooth due its production process/ characteristics. Particularly, the following features are to be considered normal:

CLOUDY EFFECTS

These are colour variations. They are typical of concrete and they are influenced by the interaction with humidity and external environmental agents. They can occur and vary at any point of the life of the product.

They are more visible when the surface of the product is left natural/unprocessed (e.g., HTC and UTC).

AIR BUBBLES

They are caused by air bubbles trying to flow out of the concrete mix but remaining trapped when reaching the surface.

HAIRLINE CRACKS

They are small fissures (non-structural), caused by the contraction of the material due to the evaporation of the humidity content. They can occur at any point of the life of the product, and they become more visible when concrete is wet.

In generale, l'aspetto superficiale del calcestruzzo non è perfettamente uniforme e liscio a causa del suo processo di produzione e delle naturali caratteristiche tecniche del materiale stesso. In particolare, le seguenti caratteristiche sono da considerarsi normali:

NUVOLATURE

Si tratta di variazioni di colore. Sono tipiche del calcestruzzo e sono influenzate dall'interazione con l'umidità e gli agenti ambientali esterni. Possono verificarsi e variare in qualsiasi momento della vita del prodotto.

Sono più visibili quando la superficie del prodotto viene lasciata liscio cassero/non trattata (ad esempio, HTC e UTC).

VAIOLATURE

Essi sono causati da bolle d'aria che cercano di fluire fuori dalla miscela di cemento, ma rimanendo intrappolati quando raggiunge la superficie.

FESSURAZIONI

Sono piccole fessure (non strutturali), causate dalla contrazione del materiale dovuta all'evaporazione del umidità contenuta nella miscela cementizia. Possono verificarsi in qualsiasi punto della vita del prodotto e diventano più visibili quando il calcestruzzo è bagnato.

En general, el aspecto superficial del hormigón no puede ser perfectamente uniforme ni liso por sus características y su proceso de producción. En particular, las siguientes características se han de considerar normales:

EFFECTOS NUBOSOS

Son variaciones de color. Son típicos del hormigón y les afecta la interacción con la humedad y los agentes ambientales externos. Pueden producirse y cambiar en cualquier momento de la vida del producto.

Son más visibles cuando la superficie del producto se deja natural/sin tratamientos (por ej.: HTC y UTC).

BURBUJAS DE AIRE

Son causadas por burbujas de aire que intentan salirse de la mezcla de hormigón, pero que permanecen atrapadas al llegar a la superficie.

GRIETAS FINAS

Son pequeñas hendiduras (no estructurales), causadas por la contracción del material debido a la evaporación de la humedad contenida. Pueden producirse en cualquier momento de la vida del producto y resultan más visibles cuando el hormigón está húmedo.

En général, l'aspect superficiel du béton ne saurait être parfaitement uniforme et lisse en raison de son procédé de fabrication et de ses caractéristiques. En particulier, les caractéristiques suivantes sont à considérer comme normales :

EFFETS NUAGEUX

Il s'agit de variations de couleur. Typiques du béton, ces effets résultent de l'interaction avec l'humidité et les agents environnementaux extérieurs. Ils sont susceptibles de se produire et de varier à tout moment de la durée de vie du produit.

Ils sont plus apparents lorsque la surface du produit reste naturelle et non traitée (par exemple, HTC et UTC).

BULLES D'AIR

Elles résultent de bulles d'air qui tentent de sortir du mélange de béton, mais restent emprisonnées une fois à la surface.

FISSURES

Ce sont de petites fissures (non structurelles), provoquées par la contraction du matériau à cause de l'évaporation de l'humidité contenue. Elles peuvent apparaître à tout moment de la durée de vie du produit, et deviennent plus apparentes lorsque le béton est humide.

VARNISH COATING ON CONCRETE - GLOSSY/MATTE

VERNICIATURA SU CEMENTO - GLOSSY/MATTE

PINTURA EN CEMENTO - GLOSSY/MATTE

PEINTURE SUR CIMENT - GLOSSY/MATTE

Bellitalia® offers the possibility of painting some concrete products with RAL colours in Glossy or Matte finish (for the available standard RAL, see Bellitalia® Color Chart on pg. 444). The coloring process involves the application of a two-component epoxy base and then two coats of colored polyurethane finish.

Bellitalia® propone la possibilità di verniciare alcuni manufatti in cemento con colorazioni RAL in finitura glossy (lucida) o matte (opaca) (per i RAL standard disponibili, vedere Bellitalia® Color Chart a pag. 444). Il processo di colorazione prevede l'applicazione di una base bicomponente epossidica e successivamente due mani di finitura poliuretanica colorata.

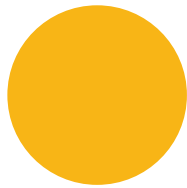

Bellitalia® propone la posibilidad de pintar algunos productos con colores RAL en acabado Glossy (brillante) y Matte (mate) (para los RAL estándares disponibles, consultar Bellitalia® Color Chart en la pág. 444). El proceso de color contempla la aplicación de una base de dos componentes epoxi y, posteriormente, dos capas de acabado poliuretánico de color.

Bellitalia® offre la possibilité de peindre certains produits en ciment avec des couleurs RAL au fini Glossy (brillant) ou Matte (mat) (voir le nuancier Bellitalia® Color Chart à la page 444 pour les couleurs RAL classiques). Le procédé de coloration implique l'application d'une base d'époxy à deux composants, puis de deux couches de finition en polyuréthane coloré.

FINISHING AND TREATMENTS

FINITURE E TRATTAMENTI

ACABADOS Y TRATAMIENTOS

FINITIONS ET TRAITEMENTS

For painted steel or stainless steel components, Bellitalia® uses polyester powders (P.P.) paints with a rough matt finish as standard. However for parts which will subsequently have adhesives applied, Bellitalia® uses P.P. paints with a smooth glossy finish. To view the available colours, see Bellitalia® Colour Chart on pg. 444

Before painting on steel, use the most suitable galvanizing treatment based on the thickness and manufacturing process characteristics of the product:

- hot dip galvanizing
- sendzimir galvanizing
- cold electrolytic galvanizing
- cathaphoresis

Per i propri componenti in acciaio o acciaio inox verniciati, Bellitalia® utilizza di norma vernici a polveri poliesteri (P.P.) con finitura opaca raggrinzante. In caso di parti predisposte per l'applicazione di adesivi, Bellitalia® utilizza invece vernici P.P. con finitura liscia lucida. Per le colorazioni disponibili, vedere Bellitalia® Color Chart a pag. 444

Prima della verniciatura su acciaio, utilizza il sistema di zincatura più adatto in base alle caratteristiche di spessore e di processo di lavorazione del manufatto:

- zincatura a caldo
- zincatura sendzimir
- zincatura elettrolitica a freddo
- cataforesi

Bellitalia® suele utilizar pinturas en polvo de poliéster (P.P.) con acabado mate rugoso para sus componentes en acero o acero inoxidable pintados. En cambio, Bellitalia® utiliza pinturas P.P. con acabado liso brillante para partes preparadas para la aplicación de adhesivos. Para los colores disponibles, consultar Bellitalia® Color Chart en la pág. 444

Antes de pintar el acero, utiliza el sistema de galvanización más idóneo en función de las características de grosor y de proceso de tratamiento del producto:

- galvanización en caliente
- procedimiento Sendzimir
- cincado electrolítico en frío
- cataforesis

Bellitalia® utilise généralement des peintures de poudre de polyester (P.P.) à finition opaque structurée pour ses composants peints en acier ou en acier inoxydable. Lorsqu'il s'agit de pièces destinées à l'application d'adhésifs, Bellitalia® utilise plutôt des peintures PP à finition lisse et brillante. Voir le nuancier Bellitalia® Color Chart à la page 444 pour connaître les couleurs disponibles.

Avant de peindre sur l'acier, utiliser le système de galvanisation le mieux adapté en fonction de l'épaisseur et des particularités du processus de transformation du produit:

- galvanisation à chaud
- galvanisation par procédé de Sendzimir
- zingage électrolytique à froid
- cataphorèse

STAINLESS STEEL

ACCIAIO INOX

ACERO INOX

ACIER INOX

For stainless steel components Bellitalia®, as standard, uses stainless steel 304 AISI or 304 L, with satin finish. It is possible, with surcharge, to request electropolishing treatment. In case of installation in particularly harsh environmental conditions, the use of 316 AISI stainless steel is recommended: in this case, check the feasibility of the variation from 304 to 316 with Bellitalia®'s sales offices.

Per i componenti in acciaio inox di norma Bellitalia® utilizza inox 304 AISI o L, con finitura satinata. E' possibile, con sovrapprezzo, richiedere trattamento di elettrolucidatura.

In caso di posizionamento in condizioni ambientali particolarmente aggressive, si raccomanda l'utilizzo di acciaio Inox 316: in tal caso, verificare la fattibilità della variazione da 304 a 316 con Bellitalia®.

Bellitalia® suele utilizar inox 304 AISI o 304 L, con acabado satinado, para los componentes de acero inoxidable. Se puede, con suplemento, pedir un tratamiento de electropulido. En caso de colocación en condiciones ambientales especialmente agresivas, se recomienda utilizar acero inoxidable AISI 316: en dicho caso, comprobar la viabilidad del cambio de 304 a 316 con Bellitalia®.

Bellitalia® utilise généralement de l'acier inoxydable AISI 304 ou 304 L, avec finition satinée pour les composants en acier inoxydable. Un traitement d'électropolissage, avec supplément, est possible sur demande. Si le produit est posé dans un environnement fortement sollicité, il est recommandé d'utiliser l'acier inoxydable AISI 316: dans ce cas, il convient de vérifier auprès de Bellitalia® si le remplacement du 304 par le 316 est possible.

PORCELAIN STONEWARE

GRES PORCELLANATO

GRES PORCELÁNICO

GRÈS CÉRAME

LIGHT / CHIARO

DARK / SCURO

Bellitalia® selected, for some of its products, the porcelain stoneware with a finish that recalls the wood veining in two different colors (light and dark).

Porcelain stoneware is an ecological and recyclable material, characterized by a good life cycle, thanks to its interesting technical qualities: resistant to thermal changes and frost, it is hygienic because non-porous, and it is salt corrosion-resistant.

Bellitalia® ha selezionato, per alcuni suoi prodotti, gres porcellanato con finitura che richiama le venature del legno in due diverse colorazioni (una chiara e una scura).

Il gres porcellanato è un materiale ecologico e riciclabile, caratterizzato da un buon ciclo di vita, grazie alle sue qualità tecniche interessanti: resistente agli sbalzi termici ed ingelivo, è igienico perchè poco poroso e presenta una buona resistenza alla corrosione salina.

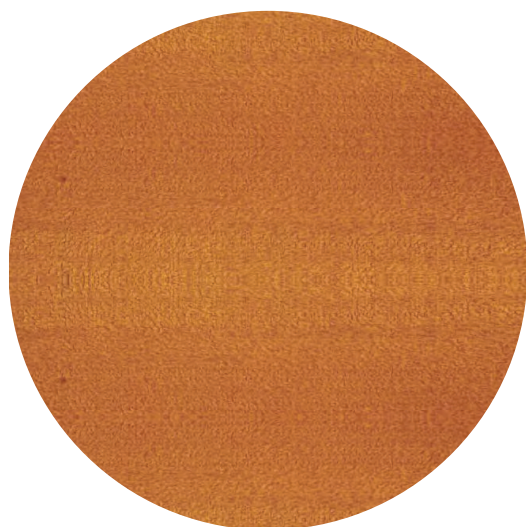

Bellitalia® ha seleccionado para algunos de sus productos el gres porcelánico con un acabado, que recuerda los veteados de la madera en dos colores diferentes (uno claro y otro oscuro).

El gres porcelánico es un material ecológico y reciclable, caracterizado por un ciclo de vida bueno, por sus calidades técnicas interesantes: resistente a los cambios bruscos térmicos y al hielo, es higiénico porque es poco poroso y presenta una resistencia buena a la corrosión salina.

Pour certains de ses produits, Bellitalia® a sélectionné un grès cérame avec une finition évoquant les veines du bois dans deux coloris différents (clair et foncé).

Le grès cérame est un matériau écologique et recyclable caractérisé par une durée de vie appréciable, grâce à ses qualités techniques intéressantes: résistant aux chocs thermiques et au gel, il est hygiénique en raison de sa faible porosité et de sa bonne résistance à la corrosion saline.

OKUMÉ / OKUMÉ / OKUME / OKUMÉ

CONIFER WOOD / CONIFERA /
MADERA DE CONÍFERA / BOIS DE CONIFÈRES

HARDWOOD / LEGNO DURO / MADERA DURA / BOIS DUR

IMPREGNATED OKUMÉ / OKUMÉ IMPREGNATO /
OKUMÉ IMPREGNADO / OKUMÉ IMPRÈGNÉ

Bellitalia® has selected three categories of woods for its products:

HARDWOOD (Iroko, Movingui or FSC Eucalyptus)

From time to time, Bellitalia® reserves the right to select the hardwoods most suited to the needs of the product and/or project and/or according to market availability.

Hardwood is supplied with a water-based pigmented finish treatment, but on request the wood can be supplied without a finish treatment. On request, hardwood is also available with FSC certification.

CONIFER WOOD (Pine, Fir or similar)

From time to time, Bellitalia® reserves the right to select the type of coniferous wood that best suits the needs of the product and/or project and/or according to market availability. Depending on the technical characteristics of the product, Bellitalia® uses laminated or solid conifer wood.

Conifer wood is always supplied with a water-based pigmented finish treatment.

On request, conifer wood is also available with FSC certification.

OKUMÉ

Depending on the technical characteristics of the product, Bellitalia® uses multilayer or solid Okumé wood.

Okumé wood is always supplied with a water-based varnish and, only on specific articles, with a coloured, green or red, water-based impregnation.

To find out the type of wood used for each product, consult the relevant page in our catalogue.

N.B. Wood is a natural material, and as such, its appearance can change naturally over time. This is mainly as a result of:

- a natural tendency to become greyer. This can be more or less marked and/or rapid depending on the type of wood and/or the environmental characteristics of the place in which the product is installed
- a natural tendency to develop cracks and fissures due to volume changes caused by climatic/environmental variations at the place the product is installed

These characteristics are thus to be considered typical and do not constitute a product defect.

However, please remember that adequate and frequent maintenance of wooden products specific to the type of wood chosen and the environmental conditions of the place in which it is installed help to preserve their quality and longevity by slowing down natural ageing of the material.

Bellitalia® ha selezionato tre categorie di legni per i propri prodotti:

LEGNO DURO (Iroko, Movingui o Eucalipto FSC)

Bellitalia® si riserva di selezionare di volta in volta i legni duri più adatti alle esigenze di prodotto e/o progetto e/o secondo le disponibilità del mercato.

Il legno duro viene fornito con trattamento di finitura pigmentato a base d'acqua, ma è possibile richiedere che il legno venga fornito senza trattamento di finitura. Su richiesta, il legno duro, è disponibile anche con certificazione FSC.

LEGNO DI CONIFERA (Pino, Abete o similari)

Bellitalia® si riserva di selezionare di volta in volta la tipologia di legno di conifera più adatta alle esigenze di prodotto e/o progetto e/o secondo le disponibilità del mercato. A seconda delle caratteristiche tecniche del prodotto, Bellitalia® utilizza legno di conifera lamellare o massello.

Il legno di conifera viene sempre fornito con trattamento di finitura pigmentato a base d'acqua.

Su richiesta, il legno di conifera è disponibile anche con certificazione FSC.

OKUMÉ

A seconda delle caratteristiche tecniche del prodotto, Bellitalia® utilizza legno di Okumé multistrato o massello.

Il legno di Okumé viene sempre fornito con verniciatura a base d'acqua, e, solo su specifici articoli, con impregnazione colorata, verde o rosso, a base d'acqua.

Per conoscere la tipologia di legno utilizzata per ciascun prodotto vedere la relativa pagina del catalogo.

N.B. Il legno è un materiale naturale e, in quanto tale, è fisiologico che vari aspetti nel tempo soprattutto grazie a:

- una naturale tendenza all'ingrigimento, più o meno marcata e/o rapida a seconda della tipologia di legno e/o delle caratteristiche ambientali del luogo d'installazione del prodotto)
- una naturale tendenza a manifestare fessurazioni e crepe a causa di variazioni di volume dettate dalle variazioni climatiche/ambientali del luogo di installazione

Tali comportamenti sono dunque da considerarsi tipici e non costituiscono difetto nel prodotto.

Si ricorda però che una adeguata e frequente manutenzione degli elementi in legno, in base alla tipologia di legno scelta e alle condizioni ambientali del luogo di installazione, aiuta a preservarne la qualità e la durata, rallentando il fisiologico processo di invecchiamento del materiale.

WOOD

LEGNO

MADERA

BOIS

Bellitalia® ha seleccionado tres categorías de maderas para sus productos:

MADERA DURA (Iroko, Movingui u Eucalipto FSC)

Bellitalia® se reserva la facultad de seleccionar en cada caso las maderas duras, más idóneas para las exigencias de producto y/o proyecto y/o en función de la disponibilidad del mercado.

La madera dura se suministra con un tratamiento de acabado pigmentado a base de agua, aunque se puede pedir que la madera se suministre sin el tratamiento de acabado. Bajo pedido, la madera dura está disponible también con la certificación FSC.

MADERA DE CONÍFERA (pino, abeto u otras similares)

Bellitalia® se reserva la facultad de seleccionar en cada caso el tipo de madera de conífera más idónea para las exigencias de producto y/o proyecto y/o en función de la disponibilidad del mercado. Bellitalia® utiliza madera de conífera laminada o maciza dependiendo de las características técnicas del producto.

La madera de conífera se suministra siempre con tratamiento de acabado, pigmentado a base de agua.

Bajo pedido, la madera de conífera está disponible también con la certificación FSC.

OKUMÉ

Bellitalia® utiliza madera Okumé multicapa o maciza dependiendo de las características técnicas del producto.

La madera de Okumé se suministra siempre con un barniz al agua y, sólo en artículos específicos, con una impregnación al agua coloreada, verde o roja..

Consultar la página relativa del catálogo para saber cuál es el tipo de madera utilizada en cada producto.

NOTA: La madera es un material natural y, por ello, es normal que cambie de aspecto con el tiempo, sobre todo por:

- una tendencia natural a agrisarse, más o menos marcada y/o rápida en función del tipo de madera y/o de las características ambientales del lugar de instalación del producto
- una tendencia natural a la aparición de hendiduras y grietas por variaciones de volumen, debidas a cambios climáticos/ambientales del lugar de instalación

Por consiguiente, dichos comportamientos se han de considerar típicos y no son defectos del producto.

Sin embargo, se recuerda que un mantenimiento adecuado y frecuente de los elementos de madera, en función del tipo de madera elegido y de las condiciones ambientales del lugar de instalación, ayuda a conservar su calidad y duración, al ralentizar el proceso natural de envejecimiento del material.

Bellitalia® a sélectionné trois catégories de bois pour ses produits:

BOIS DUR (Iroko, Movingui ou FSC Eucalyptus)

Bellitalia® se réserve de sélectionner au cas par cas les bois durs les mieux adaptés aux exigences du produit ou du projet ou en fonction des disponibilités du marché.

Le bois dur fourni reçoit un traitement de finition pigmenté à base d'eau, mais il est possible de demander à recevoir un bois sans traitement de finition. Sur demande, le bois dur est également disponible certifié FSC.

BOIS DE CONIFÈRES (pin, sapin ou similaire)

Bellitalia® se réserve de sélectionner au cas par cas les bois de conifères les mieux adaptés aux exigences du produit ou du projet ou en fonction des disponibilités du marché. En fonction des caractéristiques techniques du produit, Bellitalia® utilise du bois de conifères lamellaire ou massif.

Le bois de conifères fourni reçoit toujours un traitement de finition pigmenté à base d'eau.

Sur demande, le bois de conifères est également disponible certifié FSC.

OKUMÉ

En fonction des caractéristiques techniques du produit, Bellitalia® utilise du bois Okumé stratifié ou massif.

Le bois Okumé est toujours fourni avec un vernis à base d'eau et, uniquement pour des articles spécifiques, avec une imprégnation colorée, verte ou rouge, à base d'eau

Voir la page de catalogue correspondante pour en savoir plus sur le type de bois utilisé pour chaque produit.

Remarque: Étant donné que le bois est un matériau naturel, il est normal que son aspect change au fil du temps, principalement en raison des facteurs suivants:

- une tendance naturelle au grésillement, plus ou moins prononcée ou précoce, en fonction du type de bois ou des caractéristiques environnementales du lieu de pose du produit
- une tendance naturelle à présenter des fissures et des craquelures en raison de la variation de volume relevant des changements climatiques/environnementaux du lieu de pose

Ce type de réaction est donc à considérer comme typique et ne constitue pas un défaut du produit.

Rappelons toutefois qu'un entretien approprié et régulier des éléments en bois, adapté au type de bois choisi et aux conditions environnementales du lieu de pose, contribue à en préserver la qualité et la durabilité en ralentissant le processus de vieillissement naturel du matériau.
